

Constitutional Values Scavenger Hunt

1. Which of the constitutional values (equity, efficiency, security, liberty, community) do you see as present in the posters and handout and in the dialogue happening at the event? Give specific examples of texts or quotes from people there to support your view.

- Equity is about fairness and distribution of costs and benefits
- Efficiency is about productivity and reducing costs
- Security is about providing for people's needs (physical, economic, psychological)
- Liberty is about harms and choices
- Community is about duties and responsibility and cooperation

2. Which of these values is most relevant to solving the issue of pollution in the river? If none of these values seem like the right one, define a new value that you believe is central to solving achieving your vision of a clean and healthy river?

3. If our class put on a community event about the river what would you keep and what would you do differently?
