

Project Proposal Title: _____

Names: _____

1. How will this project reduce pollution in the river? Note – you don't have directly clean up the river. Your project indirectly reduce pollution, for example, by passing a law or bringing people together.

2. Illustrate this rationale with causal map or "logic model" showing how your project will impact different aspects of the problem and result in less pollution in the river. Draw your diagram below. Connect the different variables to the arrow.

3. Explain how you will divide responsibilities. How will everyone have an opportunity to contribute beautiful work to the final product and exhibition?

4. How does your project work with, manage, or overcome the different political dynamics around the issue of pollution in the river? Will any group in the community be opposed to your project proposal? Why or why not?

5. What political value (equity, efficiency, security, liberty, or community) does your proposal promote? How?

6. Which of the faces of power does your project idea challenge? How?
